Pest and Disease organic treatments for growing plants

Simple recipes from Marnie Johnson's U3A workshop that use pantry or simple ingredients

1. Wormwood Spray repels slugs, snails, mosquitos, flies and stink beetles

Cover wormwood leaves with boiling water, soak 12 hours

Dilute strained liquid 1 part wormwood juice to 4 parts water

The solution will last six months

Spray around the area or water around plants

2. Milk spray mildew on tomatoes, black spot on roses

1 part milk to 9 parts water

spray on areas of mildew and black spot above and below

3. Chive Spray mildew and fungus on cucumbers and zucchini and for apple scab chop up chives steep in boiling water, spray strained liquid

4. Garlic paper with corn husks and clematis leaves spray

prevent fungus on everything

Chop up leaves, blend with water, strain, spray.

5. Camomile flowers or teabags mild fungicide against powdery mildew, brown rot

Soak 2 to 3 teabags in boiling water

Spray cooled liquid on seedlings and everything

6. Tomato wilt and yellowing strawberries

The wilt is in the soil, so solarise the soil for 3 months then use a bio fumigant e.g. grow mustard or brassicas as a green crop to dig back into the soil

7. Real cinnamon powder not cassia brown rot and damping off

Damping off: sprinkle around seedlings

Brown rot: sprinkle on vegetables and fruit trees particularly the blossom and fruits

8. Willow Bark Tea or Asprin tea preventative folia spray

Steep willow bark or 1 tablet Asprin in 1 litre of water

Spray once a fortnight as a preventative, this helps resist disease

9. Bicarbonate spray against fungus, grapes soft leaved vegetables

1 tablespoon bicarbonate of soda

2.5 tablespoons sunflower oil

Mix in 4 litres of warm water

Then emulsify using 1/2 teaspoon Nivea baby soap, a pure liquid soap

Hose plants first then spray, spray again after rain. Keeps for years.

10. White oil scale and stink bugs, leaf miners

2 cups vegetable oil

1/2 cup pure liquid soap diluted

Shake well, use within three months

Don't use on soft or hairy leaves like lettuce. Kills butterflies and moths

11. Stink bugs and Caterpillars

Pick off bugs and caterpillars, you can whizz them in blender and strain and spray plants against them.

12. Apple vinegar black spot on roses

1 tablespoon of apple vinegar

4 litres of water

Spray on sturdy plants

13. Horse Radish *Insecticide* for apple trees

Grate 1/2 cup of horseradish with 1 litre of water

14. Soap spray aphids and red spider mite

1 tablespoon liquid soap, Nivea baby soap to 4 litres of water Spray on top and underneath leaves

15. Garlic and pepper spray against animals, rabbits etc

6 cloves garlic

1 tablespoon hot pepper

1 minced onion

1 teaspoon natural liquid soap

blend in 4 litres boiling water, leave to steep for a few days, strain, spray

or sprinkle hot chilli powder on leaves but wash before eating the veggies.

16. **Hot spray** against rabbits, dogs and bandicoots

4 teaspoons hot mustard powder

3 teaspoons cayenne pepper

2 tablespoons chilli powder

1 tablespoon Tabasco sauce

Mix in 4 litres of water. Wear gloves and mask

17. Kelp foliar spray to build strength against frost, black spot, brown rot, citrus curly leaf

1 cup chopped kelp or seaweed

4 litres of water

Soak spray, but remove any citrus curly leaves first

18. Nettle tea aphids and powdery mildew soak nettles for three weeks

19. Algae on paths 1 part cheap vinegar to 3 parts water

20. Coffee grounds snails and slugs

Expresso coffee from beans 10 parts water 1 part coffee strain and spray

21. Diatomaceous Earth snails and slugs, aphids etc.

scatter on soil to repel snails and slugs, spray on foliage to kill aphids and other soft bodied pests, reapply after rain.

22. Quasia Chips *repel possums* 200 gm chips in a bucket of water, soak 24 hours, strain, spray on foliage for five days in a row, leave a week before harvest.

23. 3% hydrogen peroxide for bacteria
